Sheets kept	Formulas kept	References replaced

Formula preview

Recomputed, not cached

Kept formulas remain editable. The lower line is the handoff formula. Only references to removed sheets become numbers.

Cell	Original → handoff formula	Value
Plan!C2	=B2*Derived!\$B\$2+Constants!\$B\$3 → =B2*(6)+(-2)	46
Plan!C3	=B3*Constants!\$B\$4 → =B3*(5)	10
Plan!C4	=SUM(C2:C3) → =SUM(C2:C3)	56

Removed-reference ledger

3

Plan!C2	Derived!\$B\$2 → 6
Plan!C2 → Derived!B2 → Constants!B2	
Plan!C2	Constants!\$B\$3 → -2
Plan!C2 → Constants!B3	
Plan!C3	Constants!\$B\$4 → 5
Plan!C3 → Constants!B4	

The ledger and recipe include values and calculation paths from removed sheets. Review them before sharing.

ⓘ Not validated in Microsoft Excel. Value checks cover only this bounded profile. Use a copy of important files, and open the result in the recipient's spreadsheet environment before sharing.

Small, with clear boundaries.

For small, ordinary planning workbooks and supported numeric input edits. Formula fill, structural changes, and confidential-data removal are outside this profile.

+ **Supported formulas**

Numbers, basic arithmetic, and SUM over numeric ranges. Formulas within kept sheets stay editable; references to removed sheets become numbers.

↗ **Limits & exclusions**

Up to 20 sheets, 10,000 cells, and 2,000 formulas. Unsupported functions, external links, macros, and complex workbook features are outside this profile.

⦿ **Stop when dependencies return**

If a removed cell depends on a kept sheet, freezing it would change how the workbook behaves. The app shows that path and blocks the export.
